

Teach Parents to Teach Scratch, Without Building the Course Yourself

A complete, ready-to-run workshop series that takes parents and caregivers with zero coding experience from "I have no idea what this is" to building a real game with their child. Along the way they learn the coaching moves that keep a kid coding at home. Guides, slides, workbooks, answer keys, and Scratch projects are all included.

PROJECTS

WHAT YOU GET

◆ FOR EVERY MODULE (×5)

- ◆ **Facilitator guide:** a minute-by-minute session run-sheet, live-demo scripts, and the grown-up-learner stumbles to head off
- ◆ **Teach-It role-plays:** kid cards and "say this" lines, so parents rehearse coaching before they try it at home
- ◆ **Participant workbook:** key ideas, block-by-block build steps, a learning journal, and self-checks
- ◆ **Answer key:** every self-check answered and explained, plus lab solution notes
- ◆ **Slide deck:** a self-contained projector deck with no software to install

◆ ACROSS THE KIT

- ◆ **6-session syllabus** (2 hours each), which also runs as **3 Saturday half-days**, in web and print versions
- ◆ **11 reference .sb3 projects**, including a Bug Hunt starter with four planted bugs
- ◆ **A Family Build Night plan:** kids join Session 5 to build **Star Catcher** with their parent
- ◆ **Participant setup guide** plus a celebratory **final assessment** (project + Teach-It demo) with a rubric
- ◆ Role-play kid cards, a family safety checklist, and a showcase & graduation plan

WHY INSTRUCTORS CHOOSE IT

- ◆ **Zero prep to teach.** Every session has a run-sheet that adds up to 120 minutes, with demos scripted and labs ready. You don't need to be a programmer, only a few steps ahead of the room.

- ◆ **Built for nervous grown-ups.** It anticipates the fear of "breaking something," trackpad struggles, reading-glasses font sizes, comparing yourself to faster peers, and phones buzzing with family logistics.
- ◆ **Two outcomes, not one.** Parents learn Scratch *and* learn to teach it: ask, don't tell; hands off the mouse; praise the process. That's what keeps kids coding after the class ends.
- ◆ **The night families remember.** Family Build Night and the Session 6 showcase put children at the center. It's the part that fills your next cohort by word of mouth.
- ◆ **A free companion course.** Every lesson mirrors the free online course **Scratch for Parents: Learn It, Then Teach It** (rays-scratch.netlify.app), so participants can review, catch up after a missed session, and keep going at home.

WHO IT'S FOR

Public libraries

Schools & PTAs

Community education

Homeschool co-ops

Coding clubs & makerspaces

LICENSE & PRICING

SOLO

[\$ ____] one-time

One instructor · unlimited participants

- ◆ Full kit, all 5 modules
- ◆ Print workbooks for your groups
- ◆ Perpetual license

MOST POPULAR

ORGANIZATION

[\$ ____] one-time

A library system, school, or district program

- ◆ Everything in Solo
- ◆ Unlimited instructors at one organization
- ◆ Best value per seat

WHITE-LABEL

[\$ ____] one-time

Rebrand & adapt freely

- ◆ Everything in Organization
- ◆ Add your own branding
- ◆ Edit & adapt the materials

Optional content-updates add-on: [\$ ____ / yr]. Library, school, and non-profit pricing available. Contact us for full license terms.
